

# Stencil panel cut-outs

The easy tool to create your own panel. Just use one of the stencils to draw the exact dimension of any cut out for Simkits instruments.  
Precise positioning of any mounting holes and cut out.  
The stencils are laser cut from 1 mm. thick aluminium (0,04")..

## Stencil for panel cut-outs

The TRC metal stencil for panel cut-outs can be used to produce your own panel easily. Just place one of the 11 different stencils onto your panel, use a sharp pin or pencil to draw the exact lines onto your panel and cut them out!
