Product Summary

The Ethernet controlled Altimeter is is a very precise replica of an original General Aviation Altimeter and has a double pressure scale for Inches (as used in the USA and UK) and Millibar (as used a.o. in other countries in Europe).

Product Description

The Ethernet controlled Altimeter is is a very precise replica of an original General Aviation Altimeter and has a double pressure scale for Inches (as used in the USA and UK) and Millibar (as used a.o. in other countries in Europe).
The Altimeter has 3 indicators: a 100-feet pointer, a 1000-feet pointer and a 10,000-feet indicator disc. The Altimeter pointers are driven by a special, modified servomotor which is able to run continuously.
You can regulate the air pressure scale by means of a dial on the lower left hand side of the instrument.
Included in the instrument is an electronics board with a dedicated Microprocessor. This Microprocessor connects to your PC via the included Ethernet cable to the local network.
It is constructed from high quality ABS and all parts are plastic injection molded for precise fit. The scale is high resolution print.
The Ethernet version of the Altimeter is specifically designed for X-Plane.

- High Quality (all injection molded parts) - Very Realistic - Connects via Network cable over the local network to the PC - Built-in lighting - Controlled by Servo and steppermotor - Connects to X-Plane 11 and up - Wiring is included

Product Attributes

- Dimensions: N/A
- Weight: 07 kg
- NEW!: test nieuw!!!!
- Connection; USB or Ethernet:: USB, Ethernet (+ €25,-)
