Product Summary

The Flaps Switch and Indicator is a replica of the original Cessna 172/182 Flaps Switch and Indicator. The Flaps Switch has 4 positions: Flaps Up, Flaps 10 degrees, Flaps 20 degrees and Flaps 30 degrees.

Product Description

The Flaps Switch and Indicator is a replica of the original Cessna 172/182 Flaps Switch and Indicator. The Flaps Switch has 4 positions: Flaps Up, Flaps 10 degrees, Flaps 20 degrees and Flaps 30 degrees.

The indicator is servo driven and indicates when the Flaps have reached their position. Controlled by Microsoft Flight Simulator or the SDK, the indicator "runs behind" as in the original Aircraft.

The set comes with a color print faceplate, mounting screws and all cabling.

The Flaps Switch and Indicator is connected to the PC via USB. A USB cable is included. The ethernet version of the Flaps Switch is specifically designed for use with X-Plane and connects to a switch via an ethernet connection.

The picture shown is as when the Flap Switch and Indicator are mounted into a TRC472 panel. The TRC472 Panel is not included.
