Product Summary

The TRC472 glareshield is made out of black, leatherprint, non flammable 3 mm. ABS and is vacuum formed. The middle section is cutted out to hold the metal panel and instruments. Mounting holes for the metal panel are pre-drilled.

Product Description

The TRC472 glareshield is made out of black, leatherprint, non flammable 3 mm. ABS and is vacuum formed. The

middle section is cutted out to hold the metal panel and instruments. Mounting holes for the metal panel are pre-drilled. Combined with the white cabinet (which fits exactly into the front of the glareshield) you can create a complete closed flight simulator product. (See also the blank metal- or fully finished panel).

Dimensions (approx.):

Black Glareshield 106 x 50 x 12.5 cm. (approx. 41.7 x 19.7 x 4.7 inches)
