Product Summary

The TRC 180 Visual System is a 180 degree visual system to be used with our TRC 472FA/FG flight systems (or any other flight simulator system or high end game device).

The TRC 180 Visual System is a very large product that can't be shipped with regular express service. For more information about the possibilities, please use the contact form under the Inquiry tab below.

Product Description

The TRC 180 Visual System is a 180 degree visual system to be used with our TRC 472FA/FG flight systems (or any other flight simulator system or high end game device).

The TRC 180 Visual System is made out of high quality materials that will enhance the immersive experience and let the user believe he is in control of an actual airplane.

The system comes three full HD Short Throw projectors with 2.800 ANSI-lumen brightness and a contrast ratio of 25.000 : 1. The screen material is projection cloth with a high reflectance value.

Everything to run the TRC 180 Visual System is included. The complete system comes as a kit and can be constructed and calibrated in just a few hours. The included calibration & stitching software and as well a laser allows perfect alignment and precision. Nothing else needed in order to get the TRC180 up and running.
