### Product Summary

The TRC 2244 Collective is a replica of the the collective as used in the Robinson Helicopter.

### Product Description

The TRC 2244 Collective is a replica of the the collective as used in the Robinson Helicopter.

It is featured with a twist throttle handle with foam handgrip. It also has a Rotor Governor Switch built into the handle, just like the original helicopter has!

The friction of the Collective can be adjusted by the friction adjust wheel on the side.

The Collective is produced using an aluminum casing (powder coated), stainless steel tubing and stainless steel internal mechanics.

It is a highly professional product with an extended life, designed for continuous use.

The Collective is connected via USB.
