Product Summary

These brackets are for use in combination with the TRC500 GPS System and will hold the Transponder and DME on the TRC472 panel on the right side so that the TRC500 can reside in the stack (just under the radios) as this is a recommended position.

Product Description

These brackets are for use in combination with the TRC500 GPS System and will hold the Transponder and DME on the

TRC472 panel on the right side so that the TRC500 can reside in the stack (just under the radios) as this is a recommended position.

The brackets come with 4 M4 screws to mount them onto the back side of the TRC472 panel.

The brackets can also be used to mount the TRC500 GPS system onto any self designed panel.
