Product Summary

Save money with our TRC Basic Six Starter Pack. This pack contains a set of six essential flight instruments.

Product Description

Save money with our TRC Basic Six Starter Pack. This pack contains a set of six essential flight instruments:

Altimeter]

The USB controlled Altimeter is is a very precise replica of an original General Aviation Altimeter and has a double pressure scale for Inches (as used in the USA and UK) and Millibar (as used a.o. in other countries in Europe).

Airspeed Indicator]

Servo driven very precise replica of the Cessna 172 airspeed indicator especially designed for flight simulation. Contact us if you want the airspeed indicator to be built with the faceplate for another aircraft.

Turn & Bank Indicator]

The USB Turn & Bank Indicator is a very precise replica of an original Turn & Bank Indicator/Turn Coordinator and can be used in simulated cockpits for General Aviation aircrafts, Airliners and Jet Fighters.

Vertical Speed Indicator]

Servo driven very precise replica of the C172 Vertical Speed Indicator especially designed for flight simulation. Contact us if you want the airspeed indicator to be built with another faceplate.

Attitude Indicator]

The USB Attitude Indicator is a very precise replica of an original artifical horizon and can be used in simulated cockpits for General Aviation, Airliners and Jet Fighters.

Heading Indicator]

The USB Heading Indicator is a very precise replica of an original Heading Indicator and can be used in simulated cockpits for General Aviation, Airliners and Jet Fighters.
