Product Summary

The TRC Flight Control Stick is the best and highest quality Flight Control Stick available on the market today. It can be used for fixed wing airplanes and for rotary wing aircrafts.

Product Description

The TRC Flight Control Stick is the best and highest quality Flight Control Stick available on the market today. It can be used for fixed wing airplanes and for rotary wing aircrafts.

It is produced from high quality materials. The casing is made from aluminum which is powder coated and highly scratch resistant. The tubing is from aluminum heavy tube and is also powder coated. The internal mechanism is produced from stainless steel for long life and daily use.

Combine our TRC Flight Control Stick with our high quality set of Rudder Pedals and you have the ultimate set of gear for a dog fight.

The TRC Flight Control Stick works as a game device and is therefore not only limited for use with Microsoft Flight Simulator, but can be used with any Flight Simulator package available on the market, like X-plane, IL2 and Combat Flight Simulator.

The TRC Flight Control Stick is connected via one USB Cable. So, you don't need an extra controller to connect the TRC Flight Controller Stick to your system.
