- USB Wet Compass - Panel Mount ()

Product Summary

The USB Wet Compass is a precise replica of an original so-called wet compass as used in real aircraft.

Product Description

The USB Wet Compass is a precise replica of an original so-called wet compass as used in real aircraft.

The compass can be built onto the top of a panel or hood in such a way, that only the Wet compass itself is visible and the magnetic/mechanical/electrical controller parts are inside the hood or panel. (Cut-out dimensions in Autocad are available from the Support Section).

The USB Wet Compass is available as a panel mounted wet compass (standard) or upside down as a ceiling mounted wet compass.

The USB Wet Compass connects directly to your PC with the included USB cable (1 meter).

The USB Wet Compass is backlit. The lighting can be controlled by software settings or via the USB Light Controller.
