Product Summary

The Ethernet Wet Compass is a precise replica of an original so-called wet compass as used in real aircraft.

Product Description

The Ethernet based Wet Compass is a precise replica of an original so-called wet compass as used in real aircraft. The compass can be built onto the top of a panel or hood in such a way, that only the Wet compass itself is visible and the magnetic/mechanical/electrical controller parts are inside the hood or panel. (Cut-out dimensions in Autocad are

available from the Support Section).
The Ethernet Wet Compass is available as a panel mounted wet compass (standard) or upside down as a ceiling mounted wet compass it has build in illumination.

- High Quality (all injection molded parts) - Very Realistic - Connects via Network cable over the local network to the PC - Built-in lighting - Controlled by stepper motor - Connects to X-Plane 11 and up - Wiring is included
